

# AirFinder Everywhere

## Enterprise Asset Visibility

### Why AirFinder Everywhere

- ✓ Battery life 3-7+ years, or rechargeable
- ✓ Seamless outdoor to indoor tracking
- ✓ Hub functionality to track associated Bluetooth tags and sensors (examples: group or individual location, temperature, humidity, shock, water, leak, tamper, open/close)
- ✓ Track and alert on asset behavior such as geofences, dwell times, transit times, separated from a group, delivered, or route history
- ✓ Pricing just dollars per month (depending on volume)
- ✓ Analytics and reporting on IoT platform
- ✓ Easy integration to any other platform
- ✓ Global SKU where LTE-M or NB-IoT coverage available

### Use Cases

Fleets and Trailers

Utility Meters

Heavy Equipment

Tools

Reusable transport items – pallets, totes, crates, surgical trays, racks, shipping containers

Cold chain monitoring and compliance

Leased or shared equipment

Election equipment

# AirFinder Everywhere Puts You in Control

## How it Works

The infrastructure for AirFinder Everywhere is simple to set up and use, taking only a few minutes to get your system up and running. AirFinder Everywhere users can choose how often they want asset tags to update status to further conserve battery varying location technologies. With the Rechargeable SuperTag, you never have to worry about replacing batteries.

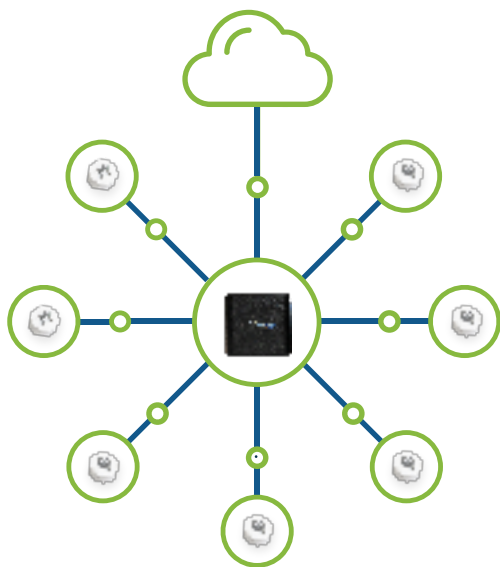

The tags can be set to update when they detect movement and how frequently while moving. The user can also choose how often the tags check-in when there's no movement. You can enable geofences to trigger alerts when the tag is leaving a zone, moving into a zone, or moving between zones. Associated Bluetooth tags can also be configured with a variety of supplemental sensor capabilities for additional monitoring and peace of mind.

### AirFinder SuperTag Models

83mm/3.3in 34mm/1.3in 118mm/4.6in 75mm/2.9in 23mm/0.9in 56.5mm 72mm/2.8in 16.6mm

Plus Pro Rechargeable

Cloud-based IoT Platform

## SuperTag Hub

The SuperTag functions as a mobile gateway to monitor and alert on associated Bluetooth tags and sensors

### Benefits

- ✓ Affordable solution
- ✓ Set up in minutes
- ✓ Utilizes smaller tags with lower price
- ✓ Track more items
- ✓ Track custody of smaller items over the road
