

# HOW AIRFINDER WORKS FOR LOGISTICS

The primary goal of a logistics company is to ensure that shipments arrive at the right place within a timely manner and without damage. It's important to have a solution in place to avoid misplacing shipments in order to help companies maintain their reputation with customers.

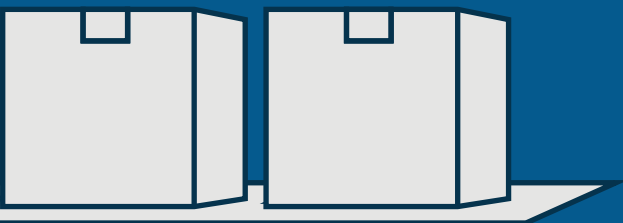

## WHY CHOOSE AIRFINDER

AirFinder provides seamless indoor and outdoor visibility, making it the ideal RTLS solution for logistics companies. Whether a product is in the warehouse or on the road, retain visibility with the same central system. Additionally, AirFinder has options for temperature monitoring that can be employed throughout the shipment process to ensure product quality and safety.

## AIRFINDER CAN HELP TRACK YOUR...

- ✓ Stored products
- ✓ In-transit products
- ✓ Pallets, crates, and bins
- ✓ Reusable equipment
- ✓ Temperature-sensitive products

## BENEFITS OF AIRFINDER FOR LOGISTICS

**Ensure proof of delivery.** Know exactly when a shipment has arrived at its ultimate destination or changed hands with real-time tracking.

**Provide accountability for in-transit losses.** Account for misplaced and damaged goods with historic records and seamless tracking between all stages of the shipment process.

**Improve upon existing processes.** Make informed decisions about process improvement in order to improve delivery time and overall operational efficiency.
