

AIRFINDER SUPERTAG PRO

Innovative Indoor & Outdoor Asset Visibility

Why the SuperTag?

-  Can sense location, shock, tampering, temperature, humidity, and more
-  Custom connectivity and update options for up to 2-5 years of battery life
-  Produces reports to provide a historical audit trail
-  Seamlessly blends indoor and outdoor tracking
-  Easy to use and can be deployed in minutes
-  Smaller form factor to better suit your needs

Use Cases

Trailer tracking

Loss and theft prevention

WIP tracking

Inventory lifecycle tracking

Tools and equipment

Supply chain management

The Innovative SuperTag Pro

How It Works

The AirFinder SuperTag Pro blends best-in-class location technologies to provide you with incredibly accurate asset intelligence whether your assets are indoors, outdoors, or anywhere in between. By leveraging a variety of positioning technologies including GPS, WiFi Lookup, BLE, and cellular-ID, the SuperTag Pro delivers unrivaled asset location flexibility. From remote inventory tracking to managing returnable assets, AirFinder SuperTag Pro enables key supply chain analytics, loss prevention, productivity workflows, and much more. This SuperTag helps you save money with its customizable connectivity and update rate options, which help preserve battery life. The tag also comes in a smaller form factor than our SuperTag Plus for added flexibility.

Platform Integrations

The data from the SuperTag Pro can easily pair with other platforms through its robust API and MQTT streams, enabling seamless data exchange and interoperability with a wide range of systems. By leveraging its flexible architecture, our solution can efficiently integrate with various telematics platforms, cloud services, and analytics tools to optimize data management and insights for your business.

Step 1

Attach tags to individual assets.

Step 2

Set up IoT software.

Step 3

Select location technologies.

Step 4

Determine how often the asset tags update.
